## SUMMARY:

Middle Frontend Developer with 3 years of production experience in technologies including TypeScript, JavaScript, React.js, React Hooks, Next.js, Redux Toolkit, Node.js, MaterialUI, and Tailwind. Built and maintained 5 large-scale web applications from scratch to release in production, developing architecture, selecting tech stack, and maintaining projects post-release. Experience in integrating backend using Node.js, Express, PostgreSQL, and Docker. Led cross-functional product teams of 4-6 members in Agile/Scrum setups, conducting code reviews according to clean code principles (SOLID, DRY, KISS, YAGNI, and design patterns). Optimized performance of high-load applications, improving response times by 30% through code optimization. Reduced application bundle size by 25% using code-splitting and lazy loading techniques. Migrated applications to Next.js and optimized SEO, resulting in a 20% increase in organic traffic. Extensive experience in high-load applications across fintech, e-commerce, and MedTech domains, covering markets in the UK, EU, USA, and Asia. Proficient in making architectural decisions and closely collaborating with backend teams to ensure seamless integration and performance in high-load environments.

## PROFESSIONAL EXPERIENCE

### Lead Frontend Developer | Qomek | Almaty, Kazakhstan

July 2023 – May 2024

**Qomek** – is an innovative product that unites laboratories and clinics across Central Asia. It serves as a rapidly growing marketplace for online medical services, providing a comprehensive platform for various healthcare needs.

#### Responsibilities:

- Developed the Qomek website and web application from scratch using React, Next.js, and TypeScript, ensuring a high level of user experience and scalability for 10 000 daily users.
- Conducted code reviews for over 10 developers, ensuring quality and improving overall project architecture.
- Participated in planning and setting tasks for upcoming sprints, prioritizing and distributing tasks within the team.
- Conducted over 15 interviews for new developers, assessing technical skills and cultural fit.
- Led the development of new features, coordinating team efforts and meeting project deadlines.
- Collaborated with other departments (product, design, marketing) to align requirements and ensure successful product releases.

Technologies: React, Next.js, TypeScript, JavaScript, Firebase, Recoil, Redux, Redux Toolkit.

### Middle Frontend Developer | Qomek | Almaty, Kazakhstan

October 2022 – July 2023

#### Responsibilities:

- Redesigned the admin panel initially written in Angular and migrated it to React, improving performance and usability, resulting in a 40% reduction in load times.
- Reduced bundle size by 25% by replacing heavy libraries and applying lazy loading.
- Created various mini-services for managers, such as dashboards and statistics panels, significantly improving internal business processes, significantly improving internal business processes by 20%.

Technologies: React, TypeScript, JavaScript, Firebase, Recoil, Redux, Redux Toolkit, Material UI.

### Middle Frontend Developer | Fortylines IO | Bishkek, Kyrgyzstan

April 2022 – October 2022

**EQMS** – is a fintech project for a Swiss microcredit company. Handled complex functionality, table logic, and calculations, ensuring system accuracy and reliability.

#### Responsibilities:

- Created numerous new functionalities based on customer requirements.
- Fixed over 40 mid to critical bugs, stabilizing project and enabling its release to production.
- Refactored code base following best practices including design patterns, enabling long-term support of 2 years old project
- Negotiated with customers to plan efficient sprints

Technologies: JavaScript, HTML, CSS, Thymeleaf, PostgreSQL, React, Typescript, Redux, Redux Toolkit, AWS.

## Frontend Developer Junior | Oracle Digital | Bishkek, Kyrgyzstan

June 2021 – April 2022

**Domket** – is a leading real estate platform in Kyrgyzstan that provides listings for buying, selling, and renting properties. It offers a comprehensive database of residential and commercial properties, including apartments, houses, and offices. Users can search for properties by various criteria such as location, price, and type.

### Responsibilities:

- Developed the frontend part, working on its interface and user experience.
- Contributed to migrating the project from React to Next.js, improving performance and SEO.
- Integrated APIs and implemented logic for various parts of the site, ensuring functionality and server interaction.
- Participated in code reviews and team discussions, enhancing my programming skills and understanding of team development processes.

Technologies: React, Next.js, JavaScript, TypeScript, Redux, Redux Toolkit.

## Frontend Development Mentor | IT-RUN | Bishkek, Kyrgyzstan

December 2021 – April 2022

**IT-RUN** – is a leading programming academy in Bishkek that offers comprehensive courses in frontend and backend development. The academy provides practical training through internships with local IT companies and uses a unique teaching methodology to ensure students achieve a junior developer level.

### Responsibilities:

- Conducted over 30 training sessions for a group of 25 students on frontend development, covering HTML, CSS, JavaScript, React, and TypeScript.
- Provided one-on-one mentorship to help students solve technical problems, conducting over 100 individual support sessions.
- Organized and led more than 20 code reviews, ensuring students adhered to best practices in coding and maintained high-quality code.
- Evaluated student progress and provided constructive feedback, helping them achieve a 90% course completion rate.

Technologies: HTML, CSS, JavaScript, React, Redux, Redux Toolkit, Typescripts.

## TECHNOLOGY SUMMARY

**Languages:** JavaScript/TypeScript.

**Frontend:** React.js, Next.js, Redux, Redux Toolkit, Redux-Saga, Recoil, SWR, react-query, Tailwind, HTML, SCSS, CSS, Styled components, MaterialUI, Socket.io, WebSockets, i18n, Mobile-first approach.

**Methodologies:** Scrum, Kanban, OOP, FP, SOLID, DRY, KISS, YAGNI, Design patterns, Unit testing.

**Testing:** React Testing Library.

**DevOps:** Docker, GitLab, Nginx.

**Additional skills:** Node.js, Express.js, REST API, PostgreSQL, MongoDB, Amazon Web Services, Firebase.

**Other:** Security, Webpack, Sentry, Jira, Swagger, Figma, yarn, npm, GitHub, GitLab, FSD (feature sliced design), Atomic design.

**Version Control:** Git.

## EDUCATION

Bachelors of Engineering in Computer Science

Tongji University,

Shanghai, China

## LANGUAGES

English – C1, Russian – native, Chinese – C1
